

# Risk Analysis—Volume 18, 1998

*Risk Analysis* provides a focal point for new developments in risk analysis for scientists from a wide range of disciplines. The analysis of risks is being increasingly viewed as a field in itself, and the demand for a more orderly and formal treatment of risks is great. *Risk Analysis* is designed to meet these needs of organization, integration, and communication. The journal covers topics of great interest to regulators, researchers, and scientific administrators. It deals with health risks, engineering, mathematical and theoretical aspects of risks, and social and psychological aspects of risks such as risk perception, acceptability, economics, and ethics. All scientific articles in *Risk Analysis* are fully peer reviewed.

**Official Journal of the Society for Risk Analysis:** Society members should direct all correspondence, such as changes of address, to Society for Risk Analysis, 1313 Dolly Madison Boulevard, Suite 402, McLean, Virginia 22101. Telephone: (703) 790-1745; fax: (703) 790-2672; e-mail: RBurk@BurkInc.com.

Statements and opinions expressed in publications of the Society for Risk Analysis or in presentations given during its regular meetings are those of the author(s) and do not necessarily reflect the official position of the Society for Risk Analysis, the editors, or the organizations with which the authors are affiliated.
